

**Your participation  
is very important  
to your community  
and the region!**

The 2020 Long Range Transportation Plan (LRTP) helps to determine how federal and state funding will be spent on transportation infrastructure and services in our communities over the next 20 years.

These workshops will solicit community initiatives including mobility needs, safety and security, quality-of-life and environmental concerns.

By participating in these workshops, you will be making a statement about the transportation improvements your community needs now and in the future.

10-1PM  
Westgate Mall  
200 Westgate  
Drive Brockton, MA 02301**

**December 15, 2018  
8-12pm  
Stoughton YMCA 445 Central  
St, Stoughton, MA 02072**

# 2020 Long Range Transportation Plan

## Goals for Regional Transportation System Investment

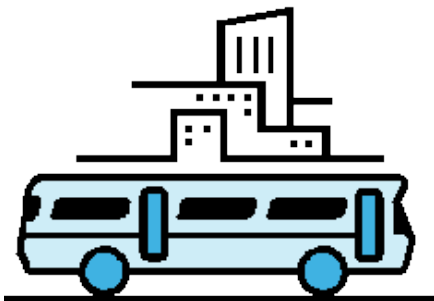

- Protect and Enhance Regional Mobility
- Foster Healthy Sustainable Livable Communities
- Enhance Safety and Security
- Expand Transportation Choices
- Support Concentrated Developments to Reduce Travel Needs
- Protect the Environment and Air Quality
- Support Economic Competitiveness

### How We Get There

**Ensure Equity:** Distribute burdens and benefits fairly — provide equitable access to transportation choices

**Ensure Fiscal Stewardship:** Prioritize investments that achieve multiple goals, giving taxpayers and passengers more for their money

**Deliver Accountability:** Promote public and private collaboration with meaningful community participation, and transportation agencies that take responsibility for their actions

## Discussion Topics at the Workshops

1. **Protecting and Enhancing Regional Mobility:** Our region is striving to keep pace with growth in mobility corridors that lead to traffic congestion. Targeting improvements to the most critical bottlenecks, enhancing transportation options other than single-occupancy-cars, grouping destinations to reduce trips and supporting transit are some of the solutions to improve the region's mobility issues.

2. **Building Sustainable Livable Communities:** A livable community has safe streets, accessible transportation options, good schools, public/private spaces and strong accessible centers that help foster a spirit of community. Attendees will participate in discussions on how to make their community a more vibrant place to live and attractive for new businesses.

3. **Enhancing Safety and Security:** Upgrading our transportation system with new technologies and informational tools and making our communities safer and secure is one of the priorities in the Old Colony Planning Council region. Supporting strategies for mitigating natural disasters, identifying emergencies evacuation methods as well as methods to reduce the number of crashes in the region will be the focus of this workshop.

4. **Environmental Protection and Climate Change:** Reducing pollution, restoring and protecting the natural environment and animal habitat by promoting alternative methods of transportation such as bicycle and transit, encouraging the use of clean alternative fuels, use of recyclable materials for new transportation infrastructure and the use of preventative meth-

### Regional Table Events:

Quincy College  
Plymouth Campus  
36 Cordage Park Cir,  
Plymouth, MA  
Date: December 11th, 2018  
10am-2pm
